

SAFE CUTTING – NOW EVEN SMARTER.
OUR NEW PRODUCTS 2024.

THE SAFER WAY TO CUT.

martor

THE INNOVATION – NOW WITH HOLSTER.

The SECUNORM 610 XDR is a world first. Use it to effortlessly open bags of any type and thickness. "XDR" stands for "extra dirt resistant". The innovative cutting solution is perfected by the matching holster. You can safely store your SECUNORM 610 XDR in it and always have it to hand.

SECUNORM 610 XDR NO. 610001

Holster for safe storage

SECUNORM 610 XDR WITH HOLSTER NO. 610102

Bag opener incl. TRAPEZOID BLADE NO. 160099

Holster for safe storage

HOLSTER 610 XDR – NOW AVAILABLE.

The new holster is the perfect addition to the SECUNORM 610 XDR. Whether mounted at the workplace or worn on the belt, the holster always holds the knife securely and accurately. This means you have both hands free after cutting – and can, for example, pour out the bag you have just opened.

HOLSTER 610 XDR NO. 9961

Holster for safe storage
of SECUNORM 610 XDR

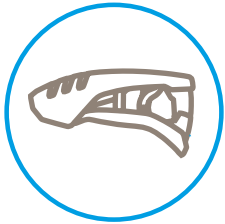

BRACKET HOLSTER
610 XDR
NO. 9962
(not included)

NEW PRODUCT FAMILY

The SECUNORM 610 XDR is the first safety knife with maximum dirt resistance. Thanks to its open design, dust and other particles do not become trapped. The holster is also equipped with numerous openings. Both products are metal detectable.

SYSTEMATIC SAFETY

You can wear the holster on your body or attach it to your workstation to keep your SECUNORM 610 XDR safe between uses. This increases your product safety, minimises the risk of loss and prevents possible contamination.

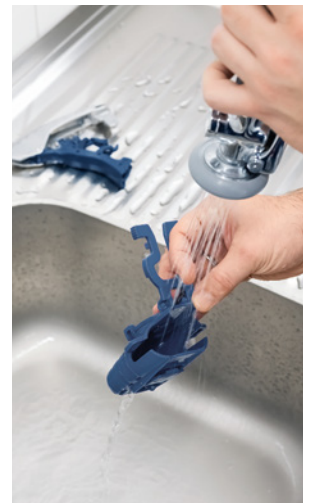

EVERYTHING ERGONOMIC

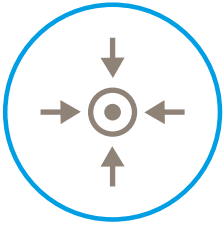

With its squeeze-grip, the SECUNORM 610 XDR fits perfectly in your hand. The holster is also comfortable to use. This is because it can be flexibly adjusted in angle and thus adapted to your body position or other surroundings.

QUICKLY CLEAN AGAIN

If your SECUNORM 610 XDR is particularly dirty, you can open it up and clean it with compressed air, water or acetone, for example. The same applies to its "partner": the holster is also ideally suited for full cleaning.

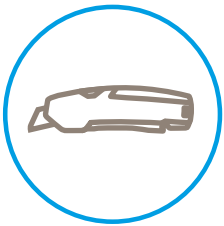

REGIONAL PROCUREMENT

We work together with excellent suppliers. Distances between us are becoming shorter and shorter – to benefit the environment and to safeguard supply chains.

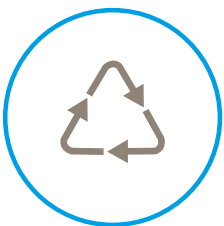

Approx. 85% of our components come from the EU, approx. 75% from Germany. Around two thirds of all parts are sourced within a radius of just 250 km.

DURABLE PRODUCTS

Excellent quality and durability are paramount to us during product development, material selection and production.

MARTOR safety knives (with interchangeable blades) can thus be used longer, which also significantly reduces material consumption.

RECYCLED PLASTICS

We want to conserve resources, at first in the area of plastics. This applies to both new and existing products. As many components as possible are being switched to recycled plastics.

We are also developing strategies to recycle raw materials at the end of the product's life cycle.

CERTIFIED PACKAGING

Sustainability is an all-round, integrated mission for us. That's why the packaging we use for our individual and multipack products is made from over 90% recycled material and 100% recyclable material.

Future packaging of our products will also increasingly use FSC-certified cardboard – starting with our safety knives made of recycled plastic.

THE SECUMAX FAMILY – NOW IN ECO.

Our SECUMAX safety knives with a concealed blade not only protect people and packaged goods – but also the environment. The recycled plastic is reinforced with glass fibre, which increases its service life. This is also sustainable.

SECUMAX 145
NO. 145001

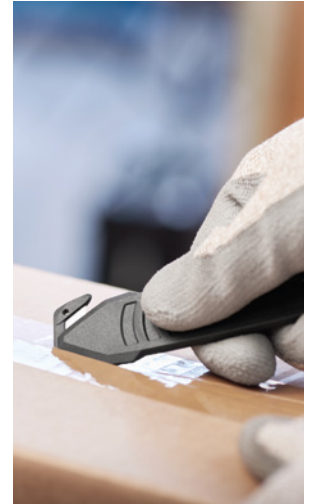

Sustainable, ergonomic and robust disposable knife

Robust blade head

Handle made from at least 60% recycled plastic plus fibreglass reinforcement

SECUMAX 150
