

MORE ECO IN OUR RANGE.

Our selection of high-quality safety knives made from recycled plastic continues to grow. The highlight of the popular SECUNORM 175 box opener: not only is the black handle now sustainable, but for the first time, all blue components are too. The world-first SECUMAX 370 also enriches our ECO by MARTOR family.

MORE CHOICE IN ALL AREAS.

Safety knives are our profession. To work with them safely and efficiently, we also offer the right accessories – such as the new tool belt. And even though most of our cutting tools are all-rounders, we leave scraping to experts like the SCRAPEX CLEANY. Reason enough to renew it.

OUR NEW PRODUCTS FOR 2025.

THE SAFER WAY TO CUT.

martor

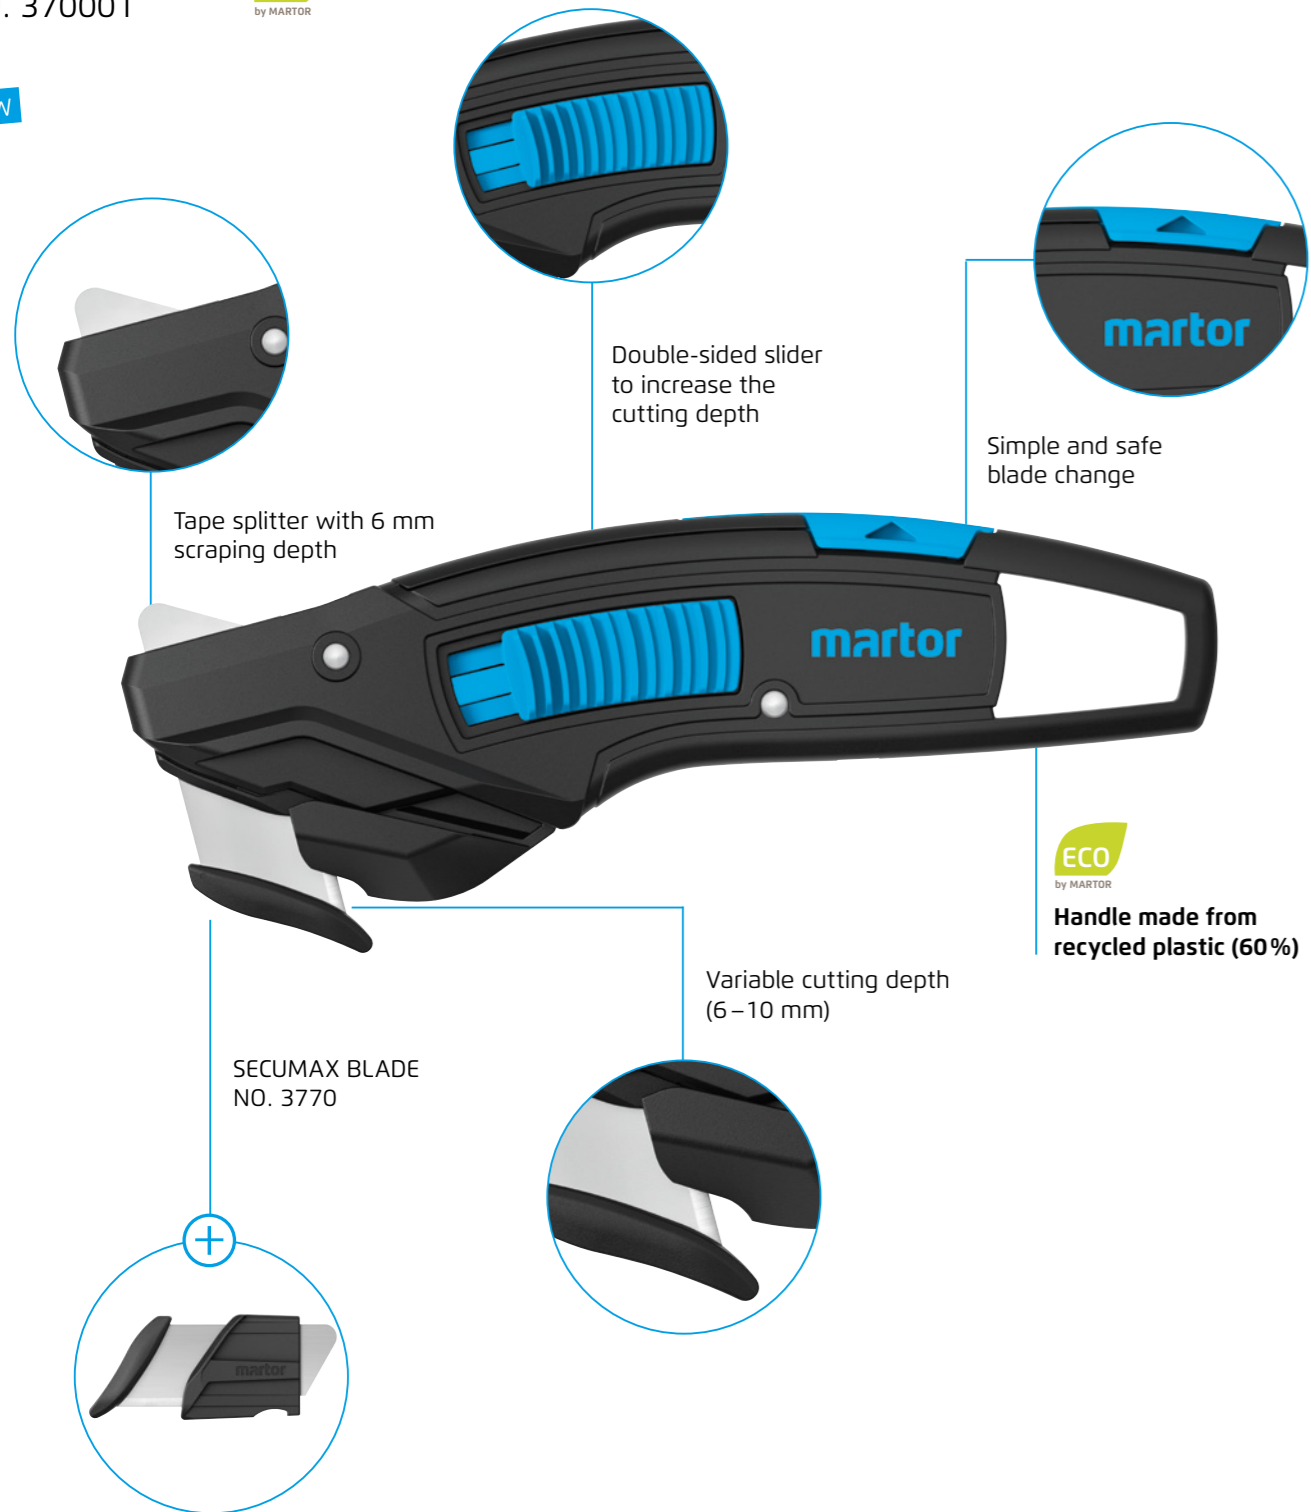

MORE CUTTING DEPTH WITH SECUMAX.

The new SECUMAX 370 is the first GS-certified safety knife with a concealed blade and a cutting depth of up to 10 mm. Until now, it was limited to 6 mm. With this world first, you can effortlessly cut through even 3-ply cardboard boxes. And you don't have to compromise on maximum user and goods protection.

SECUMAX 370
NO. 370001

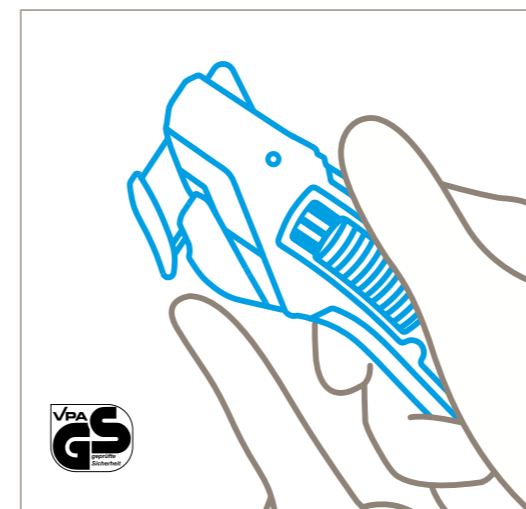

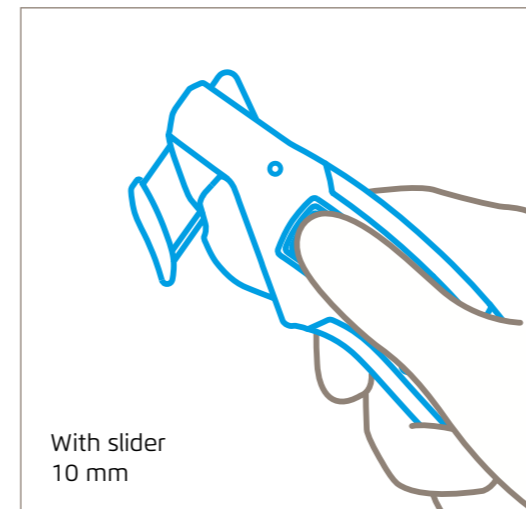

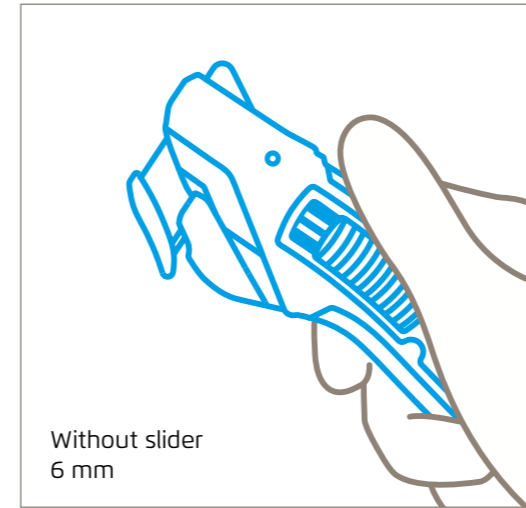

NEW

MORE THAN JUST AN INNOVATION.

The SECUMAX 370 fills a significant gap in the market. It combines exceptional cutting performance with the highest level of protection. A special feature is the double-sided slider for increasing the cutting depth to 10 mm. After cutting, it automatically returns to 6 mm. The blade is securely shielded.

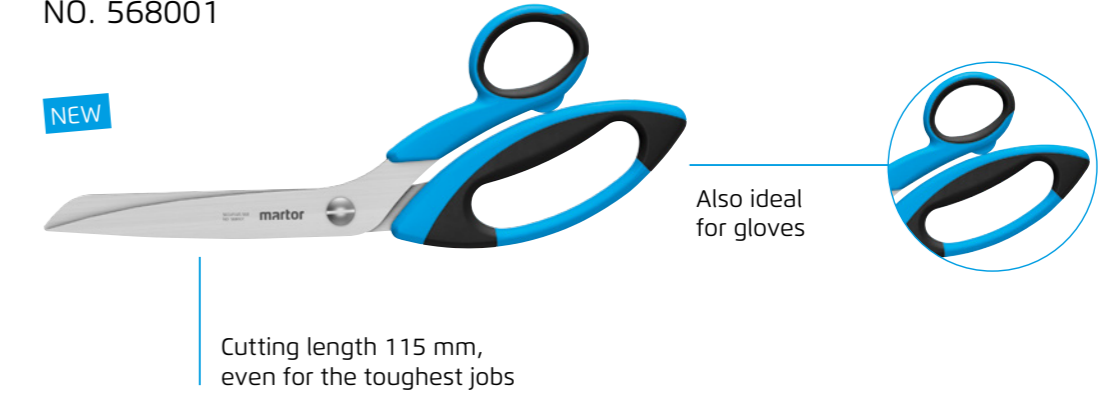

MORE POWER FOR OUR SCISSORS.

The SECUPLUS 568 are our new industrial scissors for logistics and production. Their power is just as impressive as their cutting length. The new SECUPLUS 567 MDP all-round scissors are our offering for sensitive industries, as they are completely metal detectable. And the well-known SECUPLUS 363? They now fit even better in your hand.
